Believing that the seeds we offer are excelled by none on the globe, yet our practical experience of many years fully assures us of the fact that crops may fail no matter how fresh and pure the seeds sown to produce them may be. Therefore, while we exercise the greatest care to have all seeds pure and reliable, it is hereby mutually agreed between ourselves and the purchaser that we are not in any respect liable or responsible for the seeds sold by us, or for any loss or damage arising from any failure thereof in any respect, further than that should they not prove as represented we will **refill the order without charge**.

The Lupton Cabbage.

Alneer Bros. Gentlemen—The Early Jersey Wakefield Cabbage seed you sent me last spring was the best seed I ever used as a gardener of ten years. It all grew quick and strong. I sold 100 heads to one of my customers, and he said it was the finest early cabbage he ever saw. We put a dozen heads on the scales and they tipped the beam at 144 pounds. And every plant made a head.

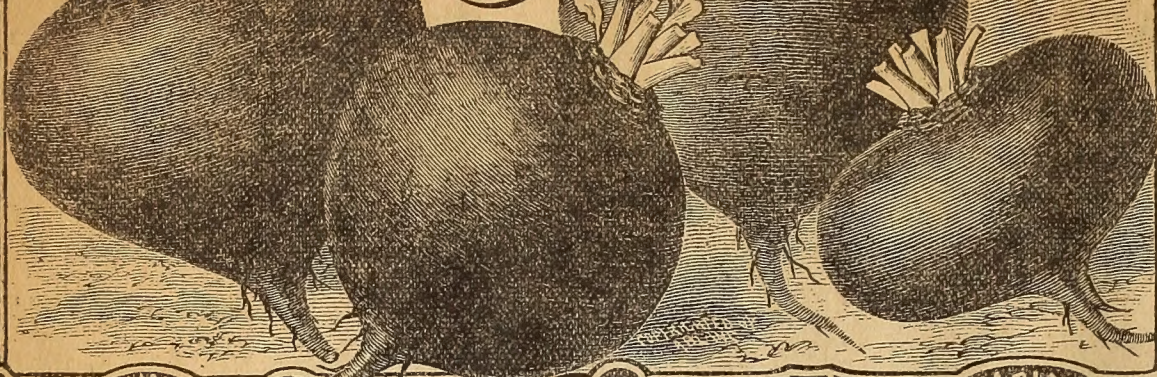

Respectfully,
S. M. HOYT.

Bluff Center, S. Dakota.

The seeds I received from you last year were extra good, and have never had such good seeds before I tried yours, so shall deal with you exclusively as long as you use me as you have done. Yours Respectfully,

Carrots thrive best in warm, light soil, enriched with well rotted manure. Sow as early in the spring as the ground can be prepared, in drills 15 inches apart; cover the seeds about one half inch deep, and thin to from 3 to 5 inches in the row. A Word About Cauliflower Seed.

Most seeds can be produced and sold much cheaper now than ever before, but Cauliflower seed is an exception to this rule. You must have Cauliflower seeds that will produce nice white heads or you might better not have any. Cheap Cauliflower seeds will not produce the heads looked for, therefore cheap Cauliflower seeds are dear at any price. Our Cauliflower seeds are grown for us by a special grower in Europe, and are the gilt edge seeds.

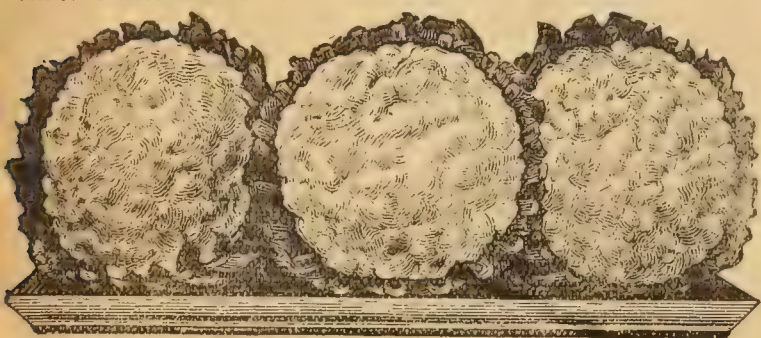

BIG BEND, PA.
ALNEER BROS.—Gentlemen:
I have used your seeds for three years and they are the best I ever tried. I have had splendid success with everything. I think every seed grows.

Cucumbers.

Cucumbers succeed best in warm, rich, loam ground. They should not be planted in open ground until settled warm weather. Plant in hills four feet apart each way. When all danger from insects is past thin out, leaving only three or four of the strongest plants to the hill.

They grow remarkably uniform; the skin is very smooth and entirely free from spines. In color they are a BEAUTIFUL PEARLY WHITE. Pkt 4c, oz 7c, 1/4 lb 20c, 1/2 lb 35c, lb 60c.

While all cucumbers are running vines, yet this variety is much more creeping and climbing in its habit, so much so that it quickly climbs on poles or trellises in the same manner as the Pole Lima Bean. It is entirely distinct, being much more rugged in its constitution and less susceptible to disease than the ordinary cucumbers, and is immensely more prolific, each vine producing from 25 to 30 cucumbers, even on poor soil. The quality is splendid. It is well adapted for pickling as well as slicing for salads. Pkt 5c, oz 15c.

✓ New Paris Pickling. As shown by the illustration, the Paris Pickling is entirely distinct from all sorts hitherto known. It is *decidedly the best of all in quality for pickling.* The young cucumbers, when of the proper age for pickling, are slim and slender, from three to five inches in length, and the entire surface of the skin is covered with delicate, black, hairy spines. So crisp and brittle are they that they snap freely and, when ready for pickling, show *absolutely no signs of seeds.* The fruit is of an unusually dark green color. The Paris Pickling is altogether *unapproached in quality.* Pkt 5c, oz 12c, 1/4 lb 40c, 1/2 lb 70c, lb \$1.25.

✓ New Giant White. The cucumbers are of a pure white color, making them very attractive for the table. They grow to a large size, reaching when full grown a length of 20 inches by 10 inches in circumference, perfectly straight and uniform from end to end. The flesh is very solid, crisp and tender. Pkt 5c, oz 8c, 1/4 lb 25c, 1/2 lb 40c, lb 75c.

✓ Giant Pera. This magnificent variety was first brought here from Turkey. They are of a most delicious flavor and grow to an enormous size, very smooth and straight, with a beautiful green skin. Are very crisp and tender. Pkt 4c, oz 8c, 1/4 lb 25c, 1/2 lb 40c, lb 75c.
